

Northbridge Facilities Group

Client Services & Operations Handbook

1. Company Overview

Northbridge Facilities Group provides commercial facility maintenance services, including HVAC servicing, industrial cleaning, and refrigeration equipment support, to businesses across the tri-county commercial corridor. Northbridge operates exclusively in the commercial and enterprise sectors and does not currently offer residential service plans.

The company holds facility license number NFG-2019-04471, issued by the state Department of Commerce. The license was last renewed in March 2024 and is valid through March 2027.

2. Service Tiers & Pricing

Northbridge offers four service tiers, each including a fixed number of scheduled visits per month. Additional visits beyond the included allotment are billed at the standard additional-visit rate of \$85 per visit.

Tier	Monthly Price	Response Time	Included Visits	Emergency Callout
RapidClean Standard	\$249	48-hour	2 / month	Not included
RapidClean Pro	\$429	24-hour	4 / month	Not included
RapidClean Pro Plus	\$612	12-hour	4 / month	Included
RapidClean Enterprise	\$980	6-hour	Unlimited	Included

Note that RapidClean Pro and RapidClean Pro Plus both include four scheduled visits per month; the difference between the two tiers is response time and emergency callout eligibility, not visit count.

Visits scheduled on a Sunday or federal holiday incur a 1.5x surcharge on the applicable per-visit rate.

3. Cancellation & Refund Policy

Clients may cancel a scheduled visit at no charge if the cancellation request is submitted more than 24 hours before the scheduled visit time.

Cancellations submitted between 24 hours and 4 hours before the scheduled visit incur a flat \$15 processing fee.

Cancellations submitted less than 4 hours before the scheduled visit, or after a technician has already been dispatched, are billed at the full applicable visit rate with no refund.

RapidClean Enterprise clients are exempt from all cancellation fees described in this section, regardless of how much notice is given.

4. Staff Certifications & Compliance

All lead technicians hold current OSHA 30-Hour General Industry certification, renewed on a 3-year cycle, and EPA Section 608 Universal certification for refrigerant handling, which does not expire once issued.

Northbridge maintains general liability insurance coverage of \$2,000,000 per occurrence, underwritten through Meridian Commercial Insurance Group, policy number MCI-88213-NB.

5. Site Access Classifications

Restricted Access Site: A client location that requires each visiting technician to hold pre-approved credentials submitted at least 48 hours in advance, and to sign a physical visitor log upon arrival before entering the premises.

Secured Site: A client location equipped with Northbridge-monitored alarm systems. Secured Sites do not require pre-approved credentials or a visitor log — technicians instead complete a phone check-in with dispatch immediately before entry.

Before entering any Restricted Access Site, technicians must also complete the standard pre-entry safety checklist described in Section 6.

6. Equipment & Safety Protocols

Every service vehicle carries a minimum of two Class ABC fire extinguishers. Before entering any site classified as Restricted Access, the assigned technician must complete a documented pre-entry safety checklist, which is filed with dispatch and retained for 90 days.

7. Client Onboarding Process

1. Initial site survey — a Northbridge representative visits the site to assess scope and classify access level (Restricted Access or Secured Site).
2. Tier selection — the client selects a service tier based on the survey's recommended visit frequency.
3. Credential submission — for Restricted Access Sites only, the client submits technician credential approvals at least 48 hours before the first scheduled visit.
4. Contract signing and billing setup — client signs the service agreement and provides billing details.
5. First scheduled visit — service begins on the agreed start date.

8. Glossary of Terms

Dispatch: Northbridge's internal scheduling and coordination team, reachable by phone during business hours.

Lead Technician: A technician holding both OSHA 30-Hour and EPA Section 608 certification, authorized to work unsupervised.

Additional Visit: Any scheduled visit beyond a tier's included monthly allotment, billed separately at the additional-visit rate.
